PROPOSAL DETAILS

► **REVISED** COMMUNITY CREATOR DAO

We are offering to support the Cult Dao mission by funding contest and grants for the community to create stories that spread. This can be used however the community wants.

We will re-route most of the tax to a multi sig wallet to be used as a Cult Community Dao. Re-route will be automated and permanent per the next section

► **REVISED** RENOUNCED TOKENOMICS

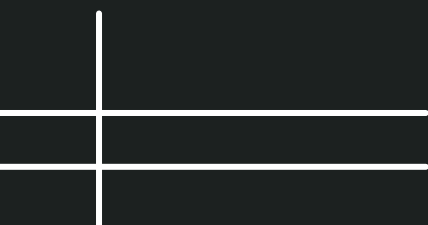

The team has decided to renounce the contract AFTER the following actions:

- 3% in \$CULT buying/rewards locked in forever
- Swapping to a new marketing wallet that uses a smart contract to automatically splits the 3% tax: 2.2% to a community DAO to support \$CULT and .8% to admins for bank marketing & incentive
- Large portion of the current funds (raised to date) will be used to kick off the Community Marketing Dao
 - 20 ETH to start pre proposal
 - We will swap in new wallet with smart contract after dispersion

► VIRAL SOCIAL DAPP

To show our commitment to Cult Dao and the #1 Rule - 'Talk About Cult' - we built an interactive dApp that curates tweets by hashtag and shows off the most engaged: <https://ryoshibnk.io/socialdapp>

This is a small slice of what we can do - we are adding constantly and can take suggestions as we progress

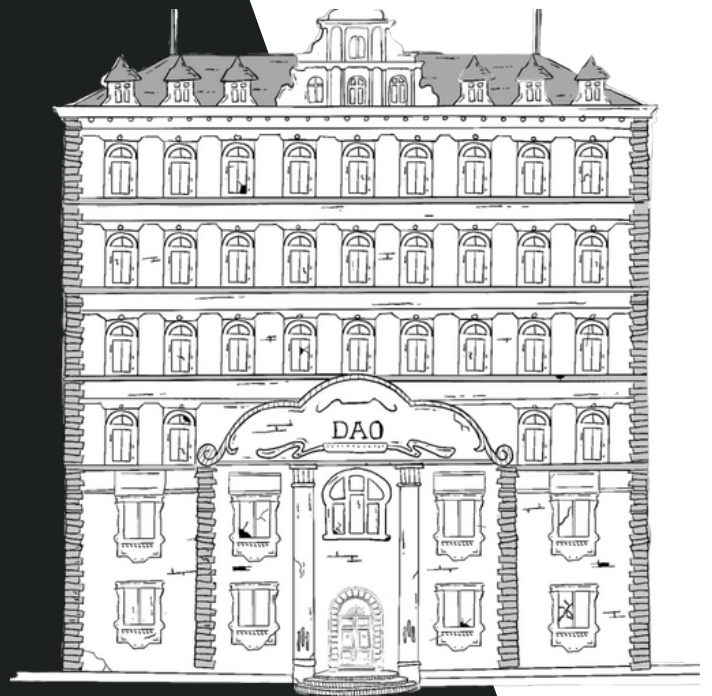

THE OFFER

13 ETH

Per the standard, we will use the 13 ETH grant to support our project in various ways, including securing tokens for Cult Dao and adding to the Community Dao

1.5% of Supply

Using the 13 ETH and additional tokens, we will give Cult Dao (the mothership) 1.5% of the total supply of Bank Of Ryoshi that vests monthly over 10 months

Closing statement for The Many

We are part of you. Every single holder of Bank of Ryoshi is automatically part of The Many with our reward system. We have many top \$CULT holders in the collective too.

We understand the force that Cult Dao is. It is in everyones best interest to have a dedicated team that fuels marketing and viral growth from the inside.

We are built to support this movement. We are the Bank Of Ryoshi.
